8000 y ago \rightarrow 6000 y ago

Humans in permanent settlements came to regard the land they lived on as their property and theirs alone. This led to violent conflicts.

By then Homo Sapiens Sapiens had populated all of Europe, Asia, and the New World.

they would eventually evolve

into Gauls, Celts, Mesopotamians
and other tribes that founded
great civilizations and fought one
another for centuries.

6000 BC - 7100 BC 1912 Dates J-BK

Lacustrine Period

Lake Dwellings

During what is known as the Lacustrine Period human habitations for security from wild beasts were built over the waters of a lake. Such dwellings exist today in central Africa, the Philippines, on the Amazon, and in Venezuela. By aid of the relics left by the lake dwellers it has been proved that they

were in Switzerland and Italy during
the Neolithic or New Stone Age. And
According to Dr. Keller remained there
until the 1st century of the Christian
era, when their dwelling ceased to
be occupied

BC
6000 years ago

By 6000 years ago BC men had learnt to work together to in hunting food-producing mammals e.g. birds & red deer

6000 BC

Neolithic farming peoples were
settling Mesopotamia

6000BC

The beginnings of food production in the river valley of the Nile and in the valley of the Fertile Crescent can be placed at about 6000BC. That is 3000 years earlier than the beginning of the Neolithic period in Northern Europe.
